

GigAxios

User Guide

Know what you actually make.

Version 1.0

A mobile-first guide for tracking gig work, fuel, maintenance, and true profitability.

GigAxios User Guide

GigAxios is designed for gig workers who want a clearer picture of what they actually earn after expenses. Instead of focusing only on gross earnings, GigAxios helps you track shifts, fuel, vehicle costs, maintenance, and profitability so you can make informed business decisions.

Welcome to GigAxios

Whether you drive for GoPuff, DoorDash, Uber Eats, Amazon Flex, Shipt, Spark, Instacart, or another platform, GigAxios helps answer one important question:

“What am I really making?”

By combining earnings, mileage, fuel costs, and vehicle expenses, GigAxios gives you a more complete picture of your gig business.

Getting Started

Create your account

GigAxios uses secure passwordless email login.

Sign in process

1. Enter your email address.
2. Check your inbox.
3. Open the login link sent to your email.
4. You will be signed in automatically.

Why no password?

GigAxios does not require or store passwords. Secure email login links simplify account access and reduce password-related security risks.

Add your first vehicle

Before tracking work, add the vehicle you use for deliveries.

Path: Settings → Add Vehicle

- Year, make, model, and optional trim
- Optional VIN
- Current odometer
- Primary Vehicle setting

The Primary Vehicle becomes the default vehicle used throughout the app.

Starting and Ending Shifts

Starting a shift

Navigate to Shifts before beginning work.

5. Select your vehicle.
6. Choose your platform.
7. Enter today's date.
8. Enter beginning mileage.
9. Tap Start Shift.

Supported platforms

- GoPuff
- DoorDash
- Uber Eats

- Amazon Flex
- Shipt
- Other

Only one active shift can be open at a time.

Ending a shift

When your workday is complete, open the active shift and enter your final work details.

10. Enter ending mileage.
11. Enter deliveries completed.
12. Enter hours worked.
13. Enter base pay, tips, and other pay.
14. Tap End Shift.

GigAxios automatically calculates total shift earnings.

Logging Fuel Fill-Ups

Navigate to Fuel whenever you purchase fuel and record the fill-up.

- Vehicle
- Date
- Odometer
- Gallons purchased
- Price per gallon
- Notes, optional

GigAxios automatically calculates total fuel cost and uses fuel data to estimate fuel cost per mile, operating costs, net profit, and vehicle efficiency metrics.

- Recent fuel entries appear below the form for easy review.

Understanding the Home Dashboard

The Home Dashboard gives you a quick overview of your current week.

Metric	Meaning
Net Profit	Estimated earnings after fuel costs.
Gross Earnings	Total income before expenses.
Work Miles	Miles driven during completed shifts.

Hourly Rate	Estimated earnings per hour worked.
Earnings Per Delivery	Average earnings for each completed delivery.

The dashboard updates automatically as shifts and fuel entries are added.

Weekly Records and Pay Adjustments

Weekly records

Navigate to Records for a Monday-through-Sunday view of your activity.

- View weekly earnings
- Review deliveries and hours worked
- Review mileage
- View adjustments
- Open daily details

Daily details

Tap any day to view deliveries, hours, mileage, gross earnings, base pay, tips, other pay, and fuel estimates. You may also edit or delete shifts and fuel entries from the daily detail screen.

Pay adjustments

Sometimes earnings arrive after a shift closes. GigAxios allows weekly adjustments while preserving the original shift data.

- Bonuses
- Promotions
- Delayed tips
- Minimum guarantee adjustments
- Corrections
- Reimbursements

Garage and Vehicle Maintenance

Navigate to Garage. Garage serves as the vehicle management center.

- Review service history
- View maintenance reminders
- Track service costs
- Monitor vehicle health
- Record maintenance performed

Adding service records

Navigate to Garage → Service and record completed maintenance.

- Oil changes

GigAxios User Guide

- Tire rotations
- Brake service
- Battery replacement
- Tire replacement
- Inspections
- Registration renewals

For each service, enter date, odometer, service type, cost, and notes. GigAxios tracks total service spending and service history automatically.

Maintenance intervals

Navigate to Settings → Service Intervals. Create reminders based on mileage, time, or both.

Service	Typical interval
Oil change	Every 5,000 miles
Tire rotation	Every 6,000 miles
Brake inspection	Every 12 months
Transmission service	Every 60,000 miles

GigAxios calculates when services become due based on your driving activity.

Maintenance reminders

Maintenance reminders help prevent missed service intervals. Reminders may be upcoming, due, or overdue. You may dismiss reminders after completing the service.

Understanding Metrics

Navigate to Metrics for a long-term business view of your gig operation.

Earnings

- Gross pay
- Net profit
- Monthly trends

Productivity

- Deliveries
- Hours worked
- Profit per delivery

Vehicle usage

- Work miles
- Business use percentage
- Average MPG

Cost analysis

- Fuel cost
- Service cost
- True cost view

Reports may be filtered by year, vehicle, or all vehicles.

Exporting Your Data

Navigate to Settings → Export My Data. Data is exported as CSV files inside a ZIP archive.

- Shifts
- Fuel entries
- Service entries
- Maintenance reminders
- Pay periods
- Pay adjustments

Account Settings

Navigate to Settings to manage vehicles, work preferences, notifications, and account options.

Vehicles

- Add vehicle
- Edit vehicle
- Archive vehicle
- Set primary vehicle

Work preferences

- Default platform

Notifications

- Maintenance reminders
- Future notification options

Account

- View email address
- Export data

Glossary

Term	Definition
Gross Earnings	Total earnings before expenses.
Net Profit	Estimated earnings after costs, especially fuel expenses.
Base Pay	Standard compensation paid by the delivery platform.
Tips	Customer gratuities.
Other Pay	Additional earnings added to a shift.
Adjustments	Bonuses, reimbursements, delayed tips, corrections, or guarantee payments.
Pay Period	The weekly reporting period running Monday through Sunday.
Work Miles	Miles driven while performing gig work.
Fuel Cost Per Mile	Estimated fuel cost for each mile driven.
Business Use Percentage	The percentage of total vehicle use related to business activity.
Service Interval	How often a maintenance item should be completed.
Maintenance Reminder	A notification indicating service is due or approaching.
Primary Vehicle	The default vehicle used throughout GigAxios.
Archived Vehicle	A vehicle removed from active use while preserving historical records.

Privacy and Data Ownership

GigAxios is designed to help users manage their own business information. Your records remain associated with your account and can be exported at any time using the built-in export tools.

Troubleshooting

I can't log in.

- Verify the email address entered.
- Check spam and junk folders.
- Wait a few minutes for the login email to arrive.
- Request a new login link if needed.

My dashboard numbers look incorrect.

- Verify shifts are properly ended.
- Confirm mileage is entered correctly.
- Make sure fuel entries are current.
- Confirm pay adjustments are assigned to the correct week.

A maintenance reminder won't disappear.

- Confirm the related service record has been entered.
- Dismiss the reminder from the Maintenance page after completing the service.

Coming Soon

Some areas of GigAxios are planned for future expansion.

- Advanced tax reporting
- Weekly summary notifications
- Low fuel alerts
- Overhead expense tracking
- Enhanced business insights
- Additional vehicle analytics

As GigAxios evolves, these features will continue expanding to provide deeper visibility into the true profitability of gig work.
